Training and Certifications

- **HackTheBox Certified Penetration Testing Specialist | HTB CPTS .**
- Hacked 250+ targets and completed extensive modules in penetration testing methodologies, Active Directory exploitation, vulnerability assessment, privilege escalation, and reporting.
- **TryHackMe Offensive Pentesting:**
- Completed 28 rooms covering buffer overflow attacks, external and internal Active Directory penetration testing.
- **TCM Security Practical Ethical Hacking**
- Skills in Active Directory, web application, and network penetration testing.
- **TryHackme SOC Leve 1**
- Topics include SIEM, endpoint monitoring, DFIR, phishing defense, and threat intelligence.

Professional Experience

Information Security Analyst | AIG (Virtual Experience, Forage) – 2024

- Conducted threat analysis simulations and vulnerability research.
- Created a remediation guide and developed a Python script to brute-force decryption keys.

Cybersecurity Consultant | Datacom (Virtual Experience, Forage) – 2024

- Investigated cyberattacks and produced risk assessments with improvement recommendations.

Cybersecurity Blogger | Medium – 2024–Present

- Authored practical writeups on HackTheBox challenges and cybersecurity projects.

Practical Projects

- Penetration testing across Linux, Windows, Active Directory, and web application targets.
- Built a secure network with Layer 2 security.
- Investigated Active Directory breaches using Windows event logs.
